Baseline Grid

The baseline grid is based on the body copy line height of 22 px (1.375rem). To increase the level of flexibility, a baseline row height of half that, 11px (0.6875rem) has been chosen.

| 11px (Baseline)
| 22px (Line Height)

All components should align to this grid to ensure a harmonious flow in the visual rhythm of the document. Atoms or elements within these components do not have to align to the baseline grid if aligning them would disrupt the balance or introduced awkward negative space.

Sidebar Content

The aside should be used for content that is related to the content in the main content area. However, the main content should still make sense standalone from the aside.

Gutter (Same as a Grid Unit)
